

# SEEING EUCLID

*a networked exhibition of Euclidean texts – summer 2018*

Throughout summer 2018, the ‘Seeing Euclid’ network of exhibitions will highlight the legacy of Euclid’s *Elements* in Early Modern Britain and Ireland, with displays of books and other artefacts from the first two hundred years of Euclid in print. Curated by the research project ‘Reading Euclid’, based at the University of Oxford and funded by the AHRC, the exhibition is a collaboration between nearly thirty institutions across Britain and Ireland. Visit us at [seeingeuclid.org](http://seeingeuclid.org) for a map of the participating locations, where you can also find stories about how people lived with, read, used and abused the *Elements of Geometry*, a most long-lived and wide-ranging cultural artefact.

## PARTICIPATING INSTITUTIONS

### *England*

University of Cambridge  
Canterbury Cathedral  
Eton College  
University of Leeds  
University of Leicester  
Lincoln Cathedral  
University of Liverpool  
University of Manchester  
Newcastle University  
University of Oxford  
Winchester College  
York Minster

### *[London]*

Middle Temple Library  
Royal College of Physicians  
Royal Society of London  
Senate House Library, University of London  
University College London

Wellcome Collection  
Westminster School

### *Northern Ireland*

Armagh Robinson Library
